NOTICE OF NOISE DISTURBANCE

Ref. No. 14 (fourteenth notice)

To: The Resident of Apartment 4B ("the Producer")
From: Apartment 4A

Dear Neighbour,

I am writing, for the fourteenth time, regarding the noise coming from your apartment. Over the past three weeks I have documented the following:

• The same 8-bar loop played approximately 2,300 times between 01:00 and 06:00.
• A bass frequency that does not come through my ears but through my bed frame, my teeth and my cat.
• Repeated shouting of the word "wachumean".
• What I can only describe as a bell. Every night. The bell.
• On Tuesday, four hours of silence, followed by the words "nah it's mid" and the loop starting again from the beginning.

I am not an unreasonable person. I asked my nephew, who "also produces", and he said your 808 is "too loud in the mix". I hope this feedback helps.

I kindly request that you:
1. Stop making beats between 00:00 and 08:00.
2. Turn the 808 down, or at least tune it to the key of the song.
3. Credit me on the track, as I have heard it more times than anyone alive.

If the noise continues, I will be forced to start making beats myself.

Sincerely,
Your Neighbour (4A)

P.S. The one from last Thursday was actually hard. Send it.

Gary, apt. 4A
